Universal Radio - Quality equipment since 1942.

TYT
TH-F5

- LCD Dot Matrix Display
- 128 Alpha Memories
- FM Rx 88-108 MHz
- Encode/Decode
- VOX Function
- Wide/Narrow BW
- LiON Battery
- 4/2/1 Watts RF

The **TYT TH-F5 VHF** is a value priced 2 meter HT. Power output is selectable at 4, 2 or 1 watts. Receive coverage is 136-174 MHz plus the FM broadcast band! The bandwidth is 12.5/25 kHz selectable. This radio is supplied with 7.4V 1500 mAh Li-ion battery, drop-in charger, SMA type antenna, belt clip and carry strap.

List \$99.00 Order #5565 **\$79.95**

TYT
TH-UVF1

- VOX Function
- Built-in CTCSS/DCS
- 12.5/25 kHz
- Multi Scanning Modes
- Dual Display
- 128 Memories
- Voice Feature
- 4/0.5 Watts Out

The **TYT TH-UVF1** is an affordable 2 meter/440 handheld amateur transceiver with extended receive including the FM broadcast band. Power output is selectable at 0.5 or 4 watts on 144-148, 430-450 MHz. This feature-rich radio has very good build-quality despite its modest price. The bandwidth is 12.5/25 kHz selectable. This radio is supplied with 7.4V 1500 mAh Li-ion battery, drop-in charger, SMA type antenna, belt clip and carry strap. The vehicle cigar-type DC charging cable will also be included for a limited time. One year limited U.S.A. warranty.

List \$180.00 Order #5541 **\$129.95**

USED GEAR

Visit our store or website for great used equipment values. The website features a useful archive too.

UNIVERSAL BUYS RADIOS

Call, email or write and tell us what you have to sell. We can provide a quote, subject to inspection.

ICOM IC-7410

The **Icom IC-7410** provides professional performance in the 160 to 6 meter amateur bands. This specialized HF rig employs the same high grade DSP unit and double conversion super-heterodyne system developed from the latest technology used in the IC-7600, IC-7700 and IC-7800 series. It features a 15 kHz roofing filter. It utilizes Icom's proven IF-DSP technology. Like the IC-746Pro, it features a sharp black and white LCD! It features a superior general coverage receiver covering 30 kHz to 60 MHz with +30dbm 3rd order intercept point receive performance and ± 0.5 p.p.m. stability. There is a built-in bandscope function, and Baudot RTTY capability. Other refinements include: RIT/XIT, BPF, quick split function, band edge beep and CW keyer (6-48 WPM). A large chassis heat sink is employed. There is a built-in tuner. Power is 100 watts. There are both CI-V and USB ports on the rear panel. This radio requires 13.8 VDC at 23 amps. Supplied with HM-36 hand microphone, OPC-1457 DC power cable, MB-123 carry handle, CW key plug and spare fuses.

List \$2475.00 Order #0748 **Call for price.**

Looking for a new HT?

Universal Radio will give you a FREE HT Go Bag with your Icom, Kenwood or Yaesu HT purchase through 06/30/11.

These bags are also available for purchase.

HT GO BAGS

West Mountain Radio RIGBLASTER ADVANTAGE

The **RIGblaster Advantage** provides the flexibility and functionality that West Mountain Radio RIGblasters are known for *without* relying on a computer's sound card for digital mode communication. Adding the completely integrated sound card eliminates the need to reconfigure a computer's internal sound card, thus freeing the PC's existing sound card to generate system sounds, music etc. Compatible with 2500 radios!

RB/AD/CUSB Order #5661 \$189.95

HY POWER OCF

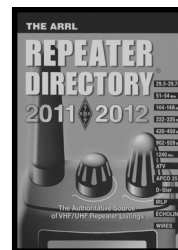

The **Hy Power Off Center Fed** antennas are very efficient and effective multi-band antennas. They feature stainless steel hardware, #12 UV insulated wire and GU4-HF-5KW-A Guanella 4:1 current baluns rated at 5000 watts. Completely assembled - just add your coax cable and rope.

| Model | Bands | Feet | Order# | Price |
|--------------|---------------------|------|--------|-----------------|
| OCF80 | 80/40/20/17/12/10/6 | 135 | #1164 | \$129.95 |
| OCF80 | 40/20/10/6 | 66 | #0946 | \$114.95 |

ARRL REPEATER DIRECTORY

This famous 3 1/4" by 5 1/4" pocket sized guide has 765 pages of listings for repeaters operating from 10 meters to over 1.2 GHz. This edition now includes Internet linked nodes (IRLP), WIRES-II, D-Star, APCO 25 and EchoLink®. List price \$10.95.

Order #5669 **\$9.95**

These insulated bags are great for creating an *Emergency Go Bag* for your HT. Also the perfect size for scanners and small shortwave portables. There is plenty of room for your radio, batteries, accessories, *Repeater Directory* and more. The top is zippered and it has a carry strap plus an open pocket on the front panel. 8 x 6 x 5 inches. These bags are *not* made by Icom, Kenwood or Yaesu.

CORC Spring Meeting Planned

The *Central Ohio Radio Club* will hold its annual Spring Meeting on Sunday June 12th at the Genoa Township Hall. It will start at 6 PM. Please bring a covered dish to share with a serving utensil. CORC will provide the drinks, plastic ware, cups, plates and many other surprises. Rick Tressler, K8SV, will be speaking at the next club pot luck. Rick's topic is the popular subject of using lead-acid batteries safely in the ham shack. The latest info on this will be on the CORC website at: www.corc.us. Don't miss this opportunity to meet many of the operators you have spoken with over the years.

At the January 2011 Annual Meeting close to fifty members and guests enjoyed good food, good company and John Perone's talk on the repeaters and their operation. He also spoke of some of the many changes that are coming to all the repeaters. If you missed that meeting, an article later on in this newsletter will highlight some of those changes.

Elections were held and the current slate of Officers retained their seats. Chuck Wood, WA8KKN, Tom Taft, KA8ZNY and Toni Pallone, KC8ASF were newly elected to the Board of Directors. Also, re-elected to the Board were John Hull W8RRJ and Steve Robeano WD8JKX. All of these board positions are for three years. Other happenings that night included: KB8CMW was the happy winner of the 50/50 Drawing; KD8PHI won the New Yaesu 2 meter mobile radio and Suzy Hahn (My XYL) won use the Rock Bound Rig till the next General Meeting... (Now if I can just get her to get her license.)

Greetings from the President

I want to welcome Chuck Wood, WA8KKN, Tom Taft, KA8ZNY and Toni Pallone, KC8ASF to our board of Directors. We are looking forward to the expertise they bring to the board.

Our technical committee has been very busy this spring installing new receivers on the 76, 97 and 33 repeaters. Please remember although your hand-held radio can hear the repeaters in your car or home, you may need an external antenna to be heard by the repeater solidly. This is especially true in times of bad weather. We hope you enjoy and use all the club's repeaters.

Our next potluck is Sunday, June 12, at 6PM. I hope you are able to come, meet fellow hams and learn about battery safety.

73,
Laura Perone
KA8IWB

Technical Updates

By Technical Chairman
John Perone, W8RXX

Reminder: 146.76 Repeater – PL NOW REQUIRED FULL TIME

In preparation for the new updated repeater equipment with additional receive locations the controller has been reprogrammed requiring users at ALL times to transmit a PL tone of 123.0 Hz. This change also is in effect when the repeater is in the weather watch mode.

W8RXX 146.76 Repeater – All of the new **eight** remote receiver sites are now installed. The head end / control equipment should be operational in the near future. You should notice improved receive coverage once the head end is complete. A complete NEW power point presentation of the new equipment should be available at the fall meeting.

W8NBA 147.33 Repeater – IRLP NODE #8094 We now have a tab for “IRLP” to help you on your club webpage at www.corc.us. You can also get much information on IRLP at www.irlp.net including node locations and general information. There are two additional receivers operating on 147.33. One is up North and the other is downtown. All of the receivers require 123.0 PL to access. The receive coverage is GREATLY improved.

W8RRJ 146.97 Repeater - We have added an additional receiver for the 146.97 repeater downtown. As with the other club 2 meter repeaters a PL of 123.0 is required.

There is a tab on the webpage called “Site Info”. As soon as all the upgrades are done, it will be updated to reflect all the new receive sites for all the repeaters.

FOR SALE by Jim, W8MAP 614-268-4187

HONDA EU2000i Companion generator with eco-throttle. Can connect to a regular Honda EU2000i generator with Honda Parallel Cable. Gently used at home and camping. \$850

HONDA Parallel Cable. Use to double the output by linking two EU1000i or two EU2000i generators together. \$35

VM sales extended run fuel system for HONDA EU generator. Includes aux fuel tank and quick disconnect fuel line. \$60

Generator Safety Transfer Switch. Gen Tran model 2026. Google “gen tran 2026” for picture and specs. \$110

For Sale by Bob, N8VJH 740-524-1971

Cubex 2 Element 5 Band Quad Antenna, 10-12-15-17-20 Meters - Less than 9 months old, with RG-11 Matching stubs. Original cost over \$600. Sell for \$300

VERY IMPORTANT INFORMATION! HR 607

This affects ALL of CORC's & others repeaters!
The government is trying to take 420-440 MHZ away from Amateurs!
This AFFECTS YOU! This is where repeater links are located!

To the many of you who have already written letters to your US Representative on HR 607, thank you. To you who have not gotten "a round tuit" and have not yet written, please **DO IT NOW**. **The fate of the amateur secondary allocation 440 MHz band is at stake. This is a battle we can win.** We are not the only group that would suffer from having HR 607 pass in its present form. Combined with the other groups, I feel confident we can prevail in having the offending part of the Bill removed. For example, the National Public Safety Telecommunications Council (NPSTC) has stated its support of the ARRL position (<http://www.arrl.org/news/npstc-says-hr-607-needs-to-be-amended>).

If you wish additional information go to <http://www.arrl.org/news/arrl-members-respond-to-hr-607>.

To let your US Representative know you oppose the present bill, go to <http://www.kd4pyr.net/hamletter.htm> and follow the simple instructions.

All that is needed is to insert your call sign where indicated and to click twice more to generate a letter addressed to your US Representative. The letter will be ready to print and for you to sign.

- Be sure to **sign your letter**. Letters without a handwritten signature are not effective.

- **Send signed letters to John Chwat** our legislative spokesman in Washington.

His addresses are:

US postal mail:

John Chwat, Chwat & Co.
625 Slaters Lane Suite 103
Alexandria, VA 22314

E-mail: john.chwat@chwatco.com. Scan and send signed letter as an attachment.

Fax: Number (703) 684-7594.

Do not send this letter or any letter about HR 607 to your US Senators at this time. The bill is only in the US House of Representatives.

Why send your signed letter to John Chwat? First, all postal mail to members of the US House (and other government bodies) is delayed 6 to 8 weeks in being searched for hazardous materials. Second, Mr. Chwat will increase the value of your individual letter by combining it with others and delivering a stack of letters directly to your Representative's office. This manner of delivery makes a particular impact on Congressmen.

If you feel it necessary to mail your letter directly to your Representative, do it. However, please also send a signed copy of it to Mr. Chwat for the reasons outlined above.

Thank you for your help and support in this **important** effort.

Be a Good Neighbor Revisited

By: Wm. Trigg Tabor, K8NIO

A lot of effort has gone into keeping the Central Ohio Radio Club repeaters in good working condition. Things break but they get quickly repaired and our repeater Trustees keep improving the systems to provide better reliability to the system. In fact the 16/76 W8RXX, 93/33 W8NBA and the 97/37 W8RRJ the systems are much better now than ever. Their coverage can be only described as GREAT! These machines have commercial quality high profile receivers that help them do their job, and if you haven't noticed it does take a PL Tone to access some of them, but it no longer requires a lot of power to access these Central Ohio repeaters.

There are other repeaters on these frequencies and from time to time we receive a complaint that our users are bringing up repeaters in other parts of Ohio or even in the neighboring states. Hams in Cincinnati, Cleveland, Wheeling and that state "up north" don't want to listen to one side of a Central Ohio conversation. The way to avoid this is to **ALWAYS** use the lowest power setting on your rig that will allow you to maintain communications. Don't try to DX the repeaters and keep that high power setting on your rig, power amplifiers and those very high gain antennas for simplex operation and even there you will not need it for local communications. If you have bragged about how much "smoke" you are running or that you are able to bring up the repeater after you have dropped over the normal radio horizon, you may be one of those Hams. If you haven't been "lucky" enough to receive a report from an Official Observer, keep it up and I am sure that there is one in your future or a report from a FCC Field Office that you are not operating in compliance with FCC Part 97.

Unless there is very strong storm that is causing major receiver desense and you have to get over it, always use the lowest power setting possible and reasonable antenna to carry out the desired communications.

73 and Enjoy!

Travelin' Tony's Timetables

by: Anthony "Tony" Fabro N8RRB

Good operating procedures on the radio allow for the efficient flow of communications on the air. Stations who wish to join in a conversation, or need to join due to an emergency, can do so without being intrusive.

Listed on the last two pages of the CORC Operating Manual (found on the CORC web page) are some guidelines for good operating procedures during the Weather Net, however they apply to everyday conversations as well. If it has been a while since you've read these I suggest a refresher review. In addition to what's listed, here are a couple other tips.

“Break”

The word “break”, when used to jump into a conversation, should only be used in an emergency situation. If someone jumps in with “break”, acknowledge the station and ask them to proceed with their emergency traffic. “Break” should never be used to join in on a conversation when it is not an emergency. If you wish to join a conversation, simply give your callsign between transmissions during the reset beep to let others know you are out there.

Net priority on the repeaters

The Central Ohio Severe Weather Net (COSWN) has priority over all other traffic on 146.760 and 444.200. While the readiness checks are scheduled for Tuesdays at 19:30 from Spring through Fall, the real nets can be called at any time. If you are talking on the repeater and someone from COSWN jumps in and says they need to start a net, you and any other stations in your conversation need to immediately relinquish the repeater to the net. The Weather Net control operator will give all stations the opportunity to state their callsign. Do it quickly so that the net can start.

Similarly, the Central Ohio Traffic Net (COTN) has been spending a significant amount of time on its backup repeater of 146.970. The net meets each evening at 19:15 (all are encouraged to join!). If you are on 146.970 having a conversation and the COTN net control jumps in and states that the net is about to start, immediately give your callsign and clear the frequency so that the net can proceed. Then when they ask for check-ins, state your call again and participate!

“Round Table” Discussions

The term “round table” simply means any discussion with more than two hams. Morning and afternoon rush hour drive times frequently have these types of conversations. A round table discussion could have three hams or thirty, but the protocol is the same regardless. The key is to remember who follows you in the discussion.

When you reach the end of your thought, state the callsign of the ham who should speak next. If you don’t remember chances are the person who is supposed to speak next will do so anyway. Ultimately the point is to allow all involved in the discussion a chance to speak without excluding anyone. If someone new jumps in, acknowledge their call and allow them to speak next.

Remembering a few simple tips can ensure that everyone gets their chance to speak, and that everyone who needs to be heard, can be heard.

Have a safe day.

Membership Update

By John Perone, W8RXX
Membership Chairman

Included next is a club roster, name and call only. While the mailing address of your station is public information as a ham operator, we felt that including it here would be an invasion of privacy. We do however want to list the members of the club and thank them for their support.

CORC is YOUR club and the more members we have the more the club can give back to you in performance and enhancements.

Please e-mail or call your membership chairman John, W8RXX if you hear non-members routinely on the repeaters so an invitation to join the club can be sent. THANKS!

John's contact information is: jper@insight.rr.com or 614-579-0522
